

A preview of DR. Lukash's OPERATION ART

Art is a well known tool to have children open up their inner feelings. Dr. Lukash has used art extensively to unlock those inner feelings in children and adolescents in his practice. "Children's Art as a Helpful Index of Anxiety and Self-Esteem with Plastic Surgery" by Frederick N. Lukash, M.D. Dr. Lukash wants to help your child achieve their personal best. He or she will benefit from a surgeon who has performed countless child and adolescent "quality of life" surgeries and who has seen the dramatic personal improvements they have made.

A CHILD'S FEELINGS

before and after a visible brown spot on neck removed

before and after having nose reconstruction

after on left (happy) child had cleft lip reconstruction, before on right (sad)
